

Make a difference in research for health

In the following focus areas

- **Lung Health**
- **Alzheimer's and Other Dementias**
- **Child & Youth Health**
- **Rural & Remote Health**

About Solutions Program

Funding interdisciplinary teams of researchers and knowledge-users addressing pressing health needs in Saskatchewan. Teams are strongly encouraged to include those with lived/living experience and support from community leaders/organizations, decision-makers, healthcare practitioners or industry partners.

About Funding

Through a competitive peer review process, SHRF and partners support direct costs for research projects taking place in Saskatchewan with measurable impact in focused areas through two opportunities:

Innovation Grant

Catalyzing the development of innovative solutions to address pressing health challenges.

Up to \$50,000 over one year

Impact Grant

Advancing the translation of evidence based solutions into real-world and practical applications.

Up to \$150,000 over two years

Full application requirements and details at shrf.ca/innovation-impact-grant

Teams must submit an eligibility to confirm the project and team fit the program requirements by: Sept 26th, 2024
Applications, including the research proposal, budget and team member information, are due: Nov 14th, 2024
